

14. Changes to Proposal

The INDOT Project Manager shall be consulted if the proposal is to be changed. The person initiating the change should send a letter to the Manager for concurrence. Any recommendation from the designer to modify the proposal shall be routed through the attending Production Division Manager. The letter should explain the suggested revision, include justification for the change, outline any right-of-way or broad environmental impacts, and estimate the cost difference. The initiator is advised to confer separately with INDOT's Environmental Assessment Section if the change may alter social, economic, or environmental impacts, as outlined in the project's environmental document.
